

ARCHITECTURAL

ARCHITECTURAL **STONE**

Shouldice Architectural Stone is available in such an extensive variety of sizes, colours, and finishes that we can satisfy the requirements of the most expansive design imagination, especially if that imagination is looking to mix and match.

Choose from 4 hollow core unit sizes and 10 stretcher size alternatives as standards. That's only the beginning as you may select from 9 colour variations in each of 3 texture finishes (Rock Stone, Tapestry, and Tex Stone), organized into our Standard, Legacy, and Elite series options.

The custom possibilities are virtually endless to conceive, design and complete an effectually maintenance-free, enduring project of superb, complex beauty and compelling distinction.

ARCHITECTURAL **BLOCK**

Shouldice Architectural Block is produced in many size variations with almost endless, stunning colour options. If this is not enough we can custom reproduce almost any colour you may desire.

With so many alternatives from which to choose you can elevate the traditional stature of basic block into a unique, distinctive, and striking custom result.

A PROFILE TO SUIT ANY STYLE

Variety is the spice of life! We have that covered with three distinct profiles to satisfy virtually any design taste or vision.

TAPESTRY

Tapestry offers the sophistication and contemporary appeal of both a flat, smooth surface and precisely bevelled edges.

TEX-STONE

The broad appeal of Tex-Stone, with its subtle textured surface, strikes a perfect balance between Tapestry and Rock-Stone.

ROCK-STONE

The rugged profile of Rock-Stone reflects the traditional strength and appeal of stone that has endured for centuries.

VARIOUS SIZES TO MATCH THAT STYLE

A wide range of sizes in either solid units or hollow core will meet both design objectives and construction requirements.

SOLID UNITS

90 x 79 x 257
(3 1/2" x 3 1/8" x 10 1/8")

90 x 90 x 290
(3 1/2" x 3 1/2" x 11 3/8")

90 x 57 x 397
(3 1/2" x 2 1/4" x 15 5/8")

90 x 90 x 390
(3 1/2" x 2 1/2" x 15 3/8")

90 x 190 x 390
(3 1/2" x 7 1/2" x 15 3/8")

90 x 90 x 590
(3 1/2" x 3 1/2" x 23 1/4")

90 x 140 x 590
(3 1/2" x 5 1/2" x 23 1/4")

90 x 190 x 590
(3 1/2" x 7 1/2" x 23 1/4")

90 x 290 x 590
(3 1/2" x 11 3/8" x 23 1/4")

90 x 390 x 590
(3 1/2" x 15 3/8" x 23 1/4")

HOLLOW CORE

140 x 190 x 390
(5 1/2" x 7 1/2" x 15 3/8")

190 x 190 x 390
(7 1/2" x 7 1/2" x 15 3/8")

240 x 190 x 390
(9 1/2" x 7 1/2" x 15 3/8")

290 x 190 x 390
(11 3/8" x 7 1/2" x 15 3/8")

ARCHITECTURAL INSTALLATION

The natural choice in stone

ARCHITECTURAL INSTALLATION

Shouldice Designer Stone Architectural units, sills, copings and water tables should be handled carefully. Installation of product constitutes acceptance.

- Ensure that all specified flashing and damp-proofing is installed.
- Flashing and weep holes must be installed above and below openings, the bottom of the walls and any points where water may gather.
- All head joints at copings and sills and all stone sections with projecting profiles and/or exposed top joints should be raked and made into sealant joints. Only the ends extending under the wall should be mortared joints.
- Do not bridge coping and sills over control or expansion joints.
- All sills and copings or pieces with projecting profiles should be protected during construction.
- During construction, cover open walls when rain or snow is anticipated.
- Failure to follow the above instructions may allow excessive and harmful moisture to accumulate in the wall system.

Please reference the Technical Specification section for more information on Control Joints, Flashing, etc.

MASONRY CEMENT

Shouldice Designer Stone recommends the use of Type N masonry mixed at a ratio of 3 to 1 with clean sharp masonry sand. Type S masonry should not be used in conjunction with standard veneer applications.

Use consistent batching procedures when mixing mortar and take adequate mixing time. Tool the joint after the mortar has begun to stiffen slightly. Should a joint be tooled too soon (in a wet condition) a light joint results. Conversely, if a joint is allowed to become too stiff, a dark burned joint will result.

Shouldice Designer Stone is manufactured using an integral water repellent agent which inhibits water absorption and efflorescence. The low absorption rate may affect set up time of the mortar joints in cool weather. This slow set-up time will be an advantage in warm, dry weather but it is important to keep all material covered and dry in wet or cold conditions to ensure tooling of the joint can be done at the proper time.
